

POP®

POP® Rivetool Specialty Heads

For riveting where you've never riveted before — in tight quarters, corner configurations or difficult offset applications.

These unique specialty heads easily modify POP® Power Rivetools for use in applications where standard tools will not fit. They allow perpendicular positioning of the rivet for proper setting, every time.

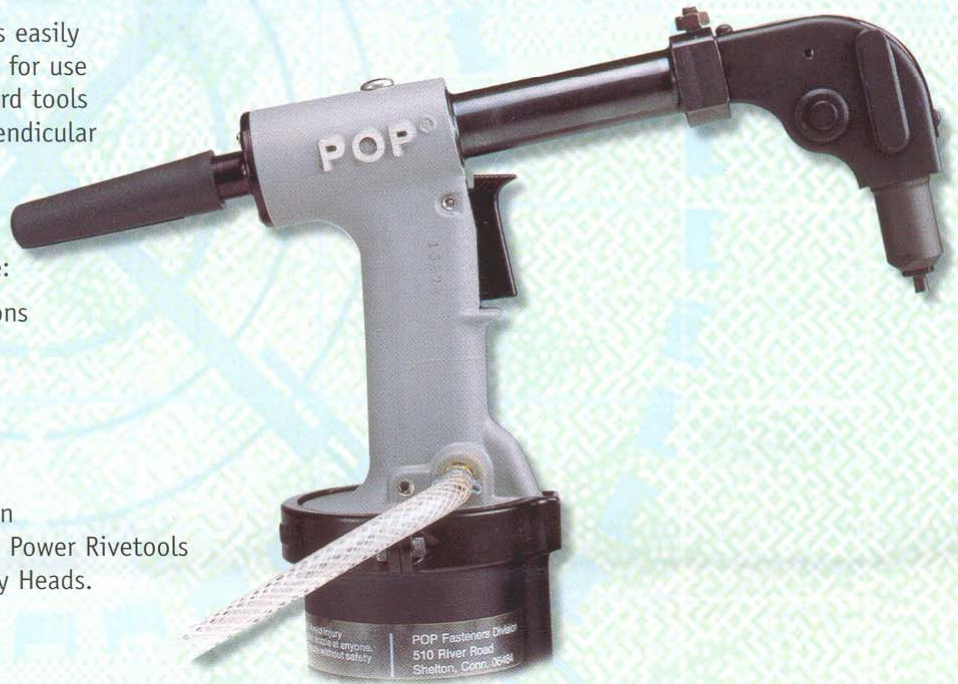

Typical valuable uses include:

- Around corner configurations
- Between cramped shelves
- Into tight compartments
- Against narrow channels
- ... any limited access area

Squeeze into your application quicker and easier with POP® Power Rivetools equipped with POP® Specialty Heads.

Typical applications:

- Electronic enclosures
- Computer box builds
- Lockers
- Postal boxes
- Appliance chassis

PRT5200 equipped with PRH840 Medium Duty Corner Head.

PRH 830
